

# Reccodo – Magento Getting Started Guide

## MODULE INSTALATION

To add module to your store:

1. Copy all extension files to the Magento root category.
2. Clean caches.

## CONFIGURATION

Reccodo configuration lies on System -> Configuration -> Reccodo.

In the settings you may enable or disable the script. The default Reccodo tracking code is in place, so no further steps are essential.

In the "Feed Links", there are the product feeds for all the available store views. Please copy them to Reccodo Dashboard (<https://app.reccodo.com>).

Click "Save Configuration" and clean caches.

The screenshot shows the 'Settings' page for the Reccodo extension. It contains the following configuration options:

- Is Enabled:** A dropdown menu set to 'Yes'. Scope: [GLOBAL]
- Script:** A text area containing the following JavaScript code:

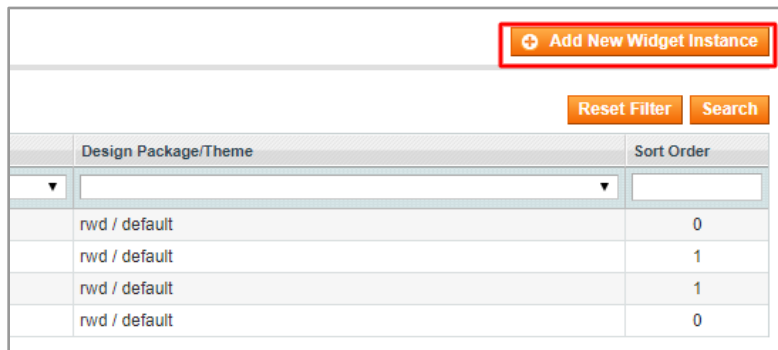

```
(function(d, s, id) {  
var js, sjs = d.getElementsByTagName(s)[0]; if  
(d.getElementById(id)) return;  
js = d.createElement(s); js.id = id; js.type =  
'text/javascript';  
js.async = true;  
js.src =  
"https://app.scibyl.com/static/js/scibyl.min.js";  
sjs.parentNode.insertBefore(js, sjs);  
})(document, 'script', 'scibyl-js');
```

Scope: [GLOBAL]
- Custom Script:** An empty text area. Scope: [STORE VIEW]
- Feed Links:** A list of URLs for different store views. Scope: [GLOBAL].
  - Website: Main Website
  - <http://scibyl-extension-m1.dev.encomage.com/scibyl/?store=default>
  - <http://scibyl-extension-m1.dev.encomage.com/scibyl/?store=french>
  - <http://scibyl-extension-m1.dev.encomage.com/scibyl/?store=german>

## ADD WIDGET

Go to CMS -> Widgets.

In the top right part of the page click “Add New Widget Instance” and follow the steps:

### 1. Add New Widget Instance

- In “Type” select Reccodo and in the “Design Package/ Theme” select your store theme, that the widget will display.
- Click “Continue”.

### 2. Frontend Properties

- For your reference you must give a name to your Widget instance, in the “Widget Instance Title”.
- “Assign to Store Views” - select the store views you want to assign. It is **important** to select only one, since the widget is specific to one language.
- In Layout Updates specify the place to show the widget.

# Reccodo – Magento Getting Started Guide

**Frontend Properties**

Type: Scibyl

Design Package/Theme: rwd / default

Widget Instance Title \*: My Widget

Assign to Store Views \*: All Store Views, Main Website, Madison Island, English, French, German

Sort Order: 0

▲ Sort Order of widget instances in the same block

Display On \*: Specified Page

Page \*: CMS Home Page

Block Reference \*: Page Top

Template: Please Select Block Reference First

**Note:** In this example the widget will be shown only on homepage on the top of the page.

### 3. Widget Options

In the widget options tab, you are pasting the HTML code that it is autogenerated from the Reccodo dashboard.

Example code:

```
<div id="sbl_recommendations" data-widget-uid="....." data-widget-type="....."></div>
```

**Important:** For multilingual websites, please contact [support@reccodo.com](mailto:support@reccodo.com).
